KIDS GPX 5.5 NECK BRACE

When needed, the KTM Neck Brace can safely arrest dangerous movements of the head in both race and road use. The forces arising are transferred effectively from the neck to the upper body. The neck brace offers scientifically and technologically advanced protection against:

- » Hyperflexion (extreme forward movement of the head)
- » Hyperextension (extreme backward movement and overstretching of the head)
- » Lateral hyperflexion (extreme movement of the head to the side)
- » Axial loading (compression of the spinal column due to a corresponding load on the helmet)
- » Posterial hypertranslation (rearwards shunting of the head into the neck)
- » Uncontrolled movements of the head / helmet in the event of a crash
- » Energy-absorbing material on the outer surface and body contact surface
- » CoreFlex in the thoracic spinal area with predefined breaking point for heavy impact situations
- » Variable size adjustment
- » Simple handling with quick-release fasteners
- » Unique height adjustment system on the back for different helmet spacings or sitting positions
- » Including revamped, optional strap
- » Detachable clip-on pads for simple cleaning and maintenance
- » Made exclusively for KTM by Leatt
- » 82 % nylon / 15 % EVA / 3 % other

QUALITY

WHY IT'S CALLED "KTM" POWERWEAR

If you ride a KTM, you know why: Because KTM is truly a READY TO RACE motorcycle. Unrivaled dynamics, outstanding workmanship and quality-built motorcycles that have been tried and tested down to the smallest detail. Each KTM has been built and tested by genuine off-road motorcycle riders and racers. READY TO RACE! With precisely this aspiration, we also develop and produce the KTM PowerWear collection- stylish sportswear made of outstanding quality, and rider equipment tested by professionals.

RESPONSIBILITY

It is our responsibility to produce sustainable, high-quality products. For instance, we only use raw yarn, fabrics and colorings certified according to the OEKOTEX 100 standard in the sportswear textiles (including T-shirts, sweatshirts, baby clothing) produced in Europe. The cotton fabrics used have very long fibers and are extremely shape-retentive, while elaborate, reactive coloring processes ensure a maximum length of color fastness. We import high quality and durable nylon yarns (produced mainly in the Far East) for the important materials used in motorcycle clothing. We test all textiles regularly for prohibited substances, such as AZO dyes and allergenic constituents. Just as regularly, we check that exclusive use is made throughout the world of certified production sites without child labor or illegal workers.

SIMPLY ASK THE PROFESSIONALS

One significant benefit when KTM develops rider equipment: there is no need to bring in "external experts". Our facilities are literally flooded with former and current pro riders who we can ask. For example, our production manager is a former Grand Prix racer. Or when we need to test a new off-road jacket, we can simply hand it over to the KTM Ride Orange team to put it through real life situations. Therefore, we know precisely what works in practice, and what does not.

DON'T FORGET THE OIL CHANGE!

A t-shirt is like a dirtbike; you can enjoy it longer if you stick to the proper maintenance instructions. Although there is no need for an oil change with an off-road jacket, there are still a few things that ought to be observed. Otherwise, nylon can discolor, leather can break or the t-shirt may shrink more than it should. The things that you need to be aware of are specified on the care label. Our promise: If you follow the instructions listed on the care label, you will increase the life of your PowerWear product.
